Air pollution ^T	Address, PC6	2009	Institute of Risk Assessment Sciences (IRAS) European Study of Cohort for Air Pollution Effects (ESCAPE)	Annual average outdoor air pollution concentrations (e.g., NO ₂ , NO _x , PM _{2.5} , PM ₁₀ , PM _{2.5} absorbance)
Air pollution ^G PM_{2.5} PM₁₀ NO₂ SOOT (EC)	Address, PC6 (25 m raster)	2013, 2014, 2015, 2016, 2017 (NO ₂ not for 2013)	Institute for Public Health and the Environment (RIVM), Atlas Leefomgeving (ALO), http://www.atlasleefomgeving.nl	Annual average outdoor pollution concentrations modeled / interpolated on the basis of measurement data, traffic data and the physical environment. All data can be viewed in https://www.atlasleefomgeving.nl/kaarten
Airport noise Schiphol 2016 ^G	Address, PC6	2016 (measurement period nov. 2015-nov. 2016)	Ministry of I&W	Separate data available for day and night (noise in Lden)
Altitude (AHN) ^G	Address, PC6 (raster 50 cm – 25 m)	Ca. 2000 (AHN 1) Ca. 2010 (AHN 2) Ca. 2018 (AHN 3)	Cooperation of provinces, central government and water boards	The altitude map of the Netherlands is a raster product available on different horizontal scale levels ranging from 25 meter resolution (AHN-1) to 50 cm resolution (AHN-3)
Basisregistratie Adressen en Gebouwen (BAG) ^G	Address, PC6 1:2.500 (vector – point/polygon)	2015	Kadaster	Vector dataset with houses, addresses and attribute data on utilization functions, construction year and area.

THEME	SPATIAL SCALE	PERIOD	ORIGINAL SOURCE HOLDER*	COMMENTS
Bicycle paths BGT and TOP10^G	Address, PC6 1:5.000 - 1:10.000 (vector – polygon)	2019	Kadaster	Selections from polygons in the BGT and lines in the TOP10 concerning respectively separate bicycle paths (BGT), designated bicycle lanes or mixed roads (TOP10)
Cycling and walking networks ^G	Address, PC6 1:10.000 (vector - line)	2019 (continuously updated by provider)	Landelijk Fietsplatform and Wandelnet via https://www.routedatabank.nl	These datasets include cycling and walking routes, networks and transport nodes and are based on TOP10 NL road data.
Green space ^G Green space Trees Tree height Shrubs Low vegetation	Address, PC6 (10 m raster)	2017	Institute for Public Health and the Environment (RIVM), Atlas Leefomgeving (ALO), http://www.atlasleefomgeving.nl	Different datasets related to green space were assembled by the RIVM on a 10x10 meter resolution expressed as percentage green, trees, shrubs or low vegetation per grid cell and is derived from the AHN2 and AHN3 files (“Actueel Hoogtebestand Nederland”, resolution of 0.5 m), the BAG buildings (“Basisregistratie Adressen en Gebouwen”) and the Infrared aerial photo (CIR file, resolution of 0.25 m).
Green space density^{GT}	Address, PC6, PC4, 25 m raster and neighborhood	1989, 1993, 1996, 2000, 2003, 2006, 2008, 2010, 2012, 2015	Statistics Netherlands (CBS)	Greenspace density as Z-scores based on CBS soilstatistics (BBG bodemgebruiksbestanden). The address level data is produced for 8 different neighborhood radii (150-, 250-, 350-, 500-, 750-, 1000-, 1650 and 2000 meter).

THEME	SPATIAL SCALE PERIOD	ORIGINAL SOURCE HOLDER*	COMMENTS	
Land use ⁶	Address, PC6 1:10.000 (vector – polygon)	1996, 2000, 2008, 2010, 2012, 2015	Statistics Netherlands (CBS)	Classification in 9 main land use classes and ca. 40 subclasses. Land use data also exists for 1989, 1993, 2003 and 2006. These datasets can be requested at CBS.
Land use mix / entropy index ^{GT}	Address, PC6, PC4, 25 m raster and neighborhood	1989, 1993, 1996, 2000, 2003, 2006, 2008, 2010, 2012, 2015	Statistics Netherlands (CBS)	Land use mix or entropy index as Z-scores based on CBS soilstatistics (BBG bodemgebruiksbestanden). The address level data is produced for 8 different neighborhood radii (150-, 250-, 350-, 500-, 750-, 1000-, 1650 and 2000 meter).
Parking places ⁶	Address, PC6 1:2.500 – 1:10.000	2019 (public/paid parking space) 2015 (private built-up parking space)	Kadaster / RDW	This dataset is a combination of data from the BGT, TOP10, BAG and RDW. The BAG data for private built-up parking spaces concerns the year 2015, the other data concerns 2019. Data is produced as polygon data and as derived point data.

THEME	SPATIAL SCALE PERIOD	ORIGINAL SOURCE HOLDER*	COMMENTS	
Population density ^{GT}	Address, PC6, PC4, 25 m raster and neighborhood	Yearly from 2000 to 2017 (100 m res.) 1995, 1997, 1999 (neighborhood res.)	Statistics Netherlands (CBS)	Population density as Z-scores based on CBS vierkantstatistieken (100x100 meter grid) for the years 2000 until 2017 and CBS buurtstatistieken for the years 1995, 1997 and 1999. The address level data is produced for 8 different neighborhood radii (150-, 250-, 350-, 500-, 750-, 1000-, 1650 and 2000 meter).
Public transport stops ^G	Address, PC6 (points)	2015 (update 2018)	Geodienst Rijksuniversiteit Groningen / databank Nationale Data Openbaar Vervoer (NDOV)	This is a point dataset with all public transport stops in the Netherlands (bus, ferry, metro, taxi, tram). Train stations are not part of this dataset. Public transport data is also available via OpenStreetMap, but less complete.
Railway noise 2016 ^G	Address, PC6	2016	Ministry of I&W	Data only available for 'hoofdspoorner' (main railway system) for day and night (noise in Lden)

THEME	SPATIAL SCALE PERIOD	ORIGINAL SOURCE HOLDER*	COMMENTS	
Retail and service destinations density ^{GT}	Address, PC6, PC4, 25 m raster and neighborhood	1989, 1993, 1996, 2000, 2003, 2006, 2008, 2010, 2012, 2015	Statistics Netherlands (CBS)	Retail and service destinations density as Z-scores based on CBS soilstatistics (BBG bodemgebruiksbestanden). The address level data is produced for 8 different neighborhood radii (150-, 250-, 350-, 500-, 750-, 1000-, 1650 and 2000 meter).
Side walk density ^{GT}	Address, PC6, PC4, 25 m raster and neighborhood	1989, 1993, 1996, 2000, 2003, 2008, 2012, 2015, 2019	Kadaster	Side walk density as Z-scores based on Basisregistratie Grootchalige Topografie (BGT). The address level data is produced for 8 different neighborhood radii (150-, 250-, 350-, 500-, 750-, 1000-, 1650 and 2000 meter).
Sport accommodations ^G	Address, PC6	2011-2017 (data collection period)	Mulier Instituut	Point data on type and location of sport accommodations

THEME	SPATIAL SCALE PERIOD	ORIGINAL SOURCE HOLDER*	COMMENTS	
Street connectivity ^{GT}	Address, PC6, PC4, 25 m raster and neighborhood	1989, 1993, 2001, 2003, 2012, 2015, 2019	Kadaster / DANS-KNAW	Street connectivity as Z-scores based on TOP10 road intersection data. The address level data is produced for 8 different neighborhood radii (150-, 250-, 350-, 500-, 750-, 1000-, 1650 and 2000 meter).
Topography (TOP10 NL - Basisregistratie Topografie (BRT)) ^G	Address, PC6 1:10.000	2003, 2005, 2010, 2011, 2012, 2013, 2015, 2019	Kadaster	Vektor data (points, lines, polygons) regarding road and water infrastructure, terrain features, built-up area, etc.
Topography – large scale (Basisregistratie Grootchalige Topografie - BGT) ^G	Address, PC6 1:5.000	2017, 2019	Kadaster	Vector dataset with detailed topographic features, such as sidewalks, parking places, tree locations, street furniture, etc.
Traffic noise - daily mean (mixed road, rail and air) ^T	Address, PC6, PC4	2000, 2004, 2005, 2007 and 2008	PBL Netherlands Environmental Assessment Agency	Modeled data with Empara noise tool with 25x25 m resolution on traffic noise (mixed road, rail and air traffic noise in dB) in 2000, 2004, 2005, 2007 and 2008.

THEME	SPATIAL SCALE	PERIOD	ORIGINAL SOURCE HOLDER*	COMMENTS
Traffic noise - daily mean (road only) ^T	Address, PC6, PC4	2000, 2004, 2007, 2008, 2010 and 2011	PBL Netherlands Environmental Assessment Agency	Modeled data with Empara noise tool with 25x25 m resolution on road noise in dB in 2000, 2004, 2005, 2007, 2008, 2010 and 2011. Several factors are accounted including traffic intensity, road types and sound barriers.
Traffic noise national roads ^G (highways)	Address, PC6	2006, 2011 and 2016	Rijkswaterstaat	Separate data available for day and night (noise in Lden)
Traffic incidents ^G	Address, PC6	2003 t/m 2017	Bestand geRegistreerde Ongevallen Nederland (BRON)	Provided via ESRI NI datasets
Walkability Index ^{GT}	Address, PC6, PC4, neighborhood	1989, 1993, 1996, 2000, 2003, 2006, 2008, 2010, 2012, 2015	VUmc Amsterdam, GECCO project	Composite score based on six components: 1) Population density, 2) Density of retail and service destinations (retail environment), 3) Land-use mix, 4) Street connectivity (intersection density), 5) Green space, 6) Side walk surface area.

Key statistical figures ^G	100x100 m. (‘CBS vierkant-statistieken’) PC6 / PC4	2011 till 2018 (yearly) 2000 till 2018	Statistics Netherlands (CBS)	The CBS dataset vierkantstatistieken contains basic statistics on number of inhabitants, dwellings, residential density and urbanity for all years and additional statistics from 2011 onwards. Number of available variables in postcode 4 and 6 areas depends of exact year.
Key statistical figures ^T	PC6	2004, 2010	Statistics Netherlands (CBS)	Data on key figures (e.g., demographics, income, immigrants, housing stock)
Socio-economic status ^T	PC6	2008	Statistics Netherlands (CBS)	Data on socio-economic status (e.g., high/low incomes, benefits)
Air pollution ^G C ₆ H ₆ (benzeen) CO (koolmonoxide) CO (koolmon. p98) PM_{2.5} (fijnstof) PM₁₀ (fijnstof) NH ₃ (ammoniak) NO ₂ (stikstofdioxide) NO _x (stikstofoxiden) O ₃ (ozon) SOOT (EC - roet) SO ₂ (zwaveldioxide)	1x1 km	2011-2018 (C ₆ H ₆) 2011-2018 (CO) 2011-2018 (CO) 2007-2018 (PM _{2.5}) 1995-2018 (PM ₁₀) 2011-2018 (NH ₃) 1995-2018 (NO ₂) 2011-2018 (NO _x) 2011-2018 (O ₃) 2011-2018 (SOOT – EC) 2011-2018 (SO ₂)	Institute for Public Health and the Environment (RIVM)	Annual average outdoor pollution concentrations based on a combination of model calculations and measurements from official measurement locations. SOOT (EC) maps must be seen as indicative only. Apart from ‘benzeen’ (C ₆ H ₆) and ‘koolmonoxide’ (CO) modeled future concentrations of all variables are available for the years 2020, 2025 and 2030.

THEME	SPATIAL SCALE	PERIOD	ORIGINAL SOURCE HOLDER*	COMMENTS
Accessibility ^T	PC4	1998 till 2003 (yearly), 2005	ABF Research (SWING Vastgoedmonitor 2007)	Data on accessibility (e.g., number of jobs and green spaces that can be reached via the road or by train within a certain time (15, 30, 45, 60 minutes)
Accessibility of population ^T Accessibility of households ^T	PC4	2013	ABF Research (Real Estate Monitor 2015)	Data on accessibility of population and households (e.g., number of individuals and households that can be reached by bike or by car within a certain time (15, 30,45,60 minutes)
Bicycle path density ^G	Neighborhood	2019 (for neighborhood boundaries 2016)	Landelijk Fietsplatform, Kadaster	This dataset combines bicycle paths from two lines sources (TOP10 and Landelijk fietsplatform) and one polygon input source (BGT). All data is transformed to polygons and summarized as area density per neighborhood.
Childcare facilities ^T	PC4	2011 till 2015 (yearly)	National Childcare and Playgroup Register (Real Estate Monitor 2015)	Data on a range of childcare facilities (e.g., number of KDV's, BSO's and playgroups)
Cultural facilities ^T	PC4	2001 till 2007 (yearly)	Museum Association (SWING Vastgoed- monitor 2007) Netherlands Theatre Institute (SWING Vastgoedmonitor 2007) Dutch Federation for Cinematography (SWING Vastgoedmonitor 2007) Adresdata / ABF Research (Real Estate Monitor 2015)	Data on a range of cultural facilities (e.g., number of museums, theatres, poppodia and cinema's)

THEME	SPATIAL SCALE	PERIOD	ORIGINAL SOURCE HOLDER*	COMMENTS
Educational facilities ^T	PC4	1996 till 2007 (yearly)	Centrale Financiën Instellingen (CFI) (SWING Vastgoedmonitor 2007)	Data on educational facilities (e.g., number of educational facilities and number of students stratified for educational level, sex, and age)
Food environment healthiness-index ^G	Neighborhood	2016	LOCATUS	Index score (food environment healthiness index) between -5 and + 5 according to FEHI score list by Poelman et al., 2018. The data is aggregated to neighbourhoods using point density kernels to prevent MAUP (Modifiable Areal Unit Problem) issue .
Health care facilities ^T	PC4	2003-2007 (yearly)	Vestigingen en bedden in de zorg (SWING Vastgoedmonitor 2007)	Data on health care facilities (e.g., number of several specific health care facilities)
Housing benefits ^T	PC4	1998 till 2006 (yearly)	Belastingdienst (SWING Vastgoedmonitor 2007)	Data on housing benefits (e.g., data on recipients and height/sum of housing benefits)

THEME	SPATIAL SCALE	PERIOD	ORIGINAL SOURCE HOLDER*	COMMENTS
Housing stock ^T	PC4	1998 till 2007 (yearly)	ABF Research (SYSWOV 2007)	Data on housing stock. (e.g., number of owner-occupied and rental housing, social rent, and housing stock stratified for house type)
Income ^T	PC4	2009, 2012	Statistics Netherlands (CBS)	Data on income (e.g., disposable income, capital and households in PC4 areas)
Key statistical figures ^G	PC4	1998 till 2017 (yearly)	Statistics Netherlands (CBS)	Data on key figures (sex and age of inhabitants, household composition, % immigrants) with additional statistics from 2015 onwards
Land use ^T	PC4	1996 till 2003 (yearly)	Statistics Netherlands (CBS)	Data on land use (e.g., hectares/percentages of urban/rural land use, green spaces, forests, parks traffic, public facilities, recreational areas, etc)
Livability ^T	PC4	1998, 2002, 2006, 2008, 2010, 2012	Dutch Ministry of the Interior and Kingdom Relations	Data on livability (Livability scores are based on population, social cohesion, public space, safety, level of resources, and housing)
